LIVEVAULT® 7.93 RELEASE NOTES

Version	Status	Release Date
7.93	Final	June 8, 2018

NEW FOR 7.93

This section lists the enhancements to LiveVault 7.93.

SECURITY UPDATES

- LiveVault 7.93 is built using the newest industry-standard development tools that add protection against the exploitation of conditional branch variant of SPECTRE vulnerabilities.
- Libraries that ensure secure communication in LiveVault 7.93 have been upgraded to their latest versions and to support only TLS protocol version 1.2.

APPLICATION UPDATES

- Windows 2008 R2 servers will require full patching to allow installation of LiveVault software. **AT MINIMUM**, the following Microsoft hotfixes must be applied:
 - Security Update for Windows 7 for x64-based Systems (KB3123479)
 - Security Update for Windows Server 2008 R2 x64 Edition (KB3033929)
- Windows 2016 servers will require full patching to allow installation of LiveVault software. **AT MINIMUM**, the following Microsoft hotfix must be applied:
 - Windows Server 2012 R2 Update (KB2919355)
- Users can now suspend backups or add a bandwidth policy even when their agent is on a server template.

LIVEVAULT API UPDATES

- A user of LiveVault API can no longer use a deleted or an invalid customer subscription ID when creating a new customer.
- LiveVault API no longer allows multiple customers with the same name.

Refer to the [LiveVault API home page](#) for more information on available endpoints and their usage.

WEB MANAGEMENT PORTAL

- The LiveVault Web user interface now uses updated tabs.
- Novice view (a reduced version of the left-hand navigation tree) has been removed.

DEFECTS FIXED IN 7.93

The following issues are resolved in LiveVault 7.93.

WEB MANAGEMENT PORTAL

- Fixed an error that impacted the use of the *vCenter Status View* link on the customer properties page.
- Fixed a JavaScript error that caused users to not see all tabs when creating/editing roles underneath *Advanced Settings*.

AGENT SOFTWARE

In rare cases when a system cannot retrieve the file size of an object being backed up, LiveVault now displays a warning instead of an error.

REPORTING

The Backup Log report no longer truncates very long file paths on failed backups.

MISCELLANEOUS

This section contains miscellaneous information that LiveVault® 7.93 users should know.

OPERATING SYSTEMS

- The latest LiveVault supported release for Windows Server2003, Windows Server 2008, and Linux 32 bit systems is 7.84.
- LiveVault versions 7.90 and above are not supported on Windows Server2003, Windows Server 2008, and Linux 32 bit systems.

NOTE: Microsoft ended extended support for Windows Server 2003 on July 14, 2015.
